Refereed conference proceedings
Patents
Other forms of dissemination (reports for clients, technical reports, popular press, etc)

Guidelines

This template is the one you should use whenever you are required to submit a CV as part of a research proposal to the Foundation for Research, Science and Technology (Foundation), the Health Research Council (HRC), or the Marsden Fund.

This template allows you to maintain your own master CV, from which you can draw on when submitting a research proposal.

Please note, some sections (2b, 2c, 2d) are relevant only to Foundation proposals and should be deleted if you are submitting a proposal to the HRC or Marsden Fund. The template allows you to expand/reduce sections as you see fit and depending on the sort of proposal you are submitting.

Sections

Part 1

- 1a. This section is for personal details. It identifies who you are and where you can be contacted most readily. A space is provided if you have your own personal website about your research - this is an optional field, not mandatory.
- 1b. You should list your academic qualifications in this section.
- 1c. You should list the professional positions you have held in this section.
- 1d. You should briefly describe your field of expertise in this section.
- 1e. Please list your total years of research experience in this section. Exclude periods away from research.
- 1f. This section is for significant achievements, including, but not limited to, honours, prizes, previous grants, scholarships, memberships or board appointments.
- 1g. This section is to record the total number of peer-reviewed publications and patents you have produced during your career. Only peer-reviewed or refereed publications, or patents should be counted in *each* section.

Part 2

- 2a. This section lets you list some of the peer-reviewed publications you have produced and that are relevant to your proposal. Recognising that research dissemination occurs other than through peer-reviewed publications, this section also lets you list other forms of research dissemination, such as technical reports or popular press. You should **bold** your name in the list of authors.
